**BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING**

Group I, claim(s) 1-9, drawn to a hybrid module.

Group II, claim(s) 10-16, drawn to a method.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the method of attaching electro-optical components to a support glass wafer, and to a waveguide support glass would not result in the claimed hybrid module.
